With the OCT Health Scan

It's not just your vision we care about, it's your health too. With an OCT eye scan, we can detect numerous diseases such as Diabetes, Glaucoma, Age Related Macular Degeneration and much more...

It's not just your vision
we care about -
It's your health too!

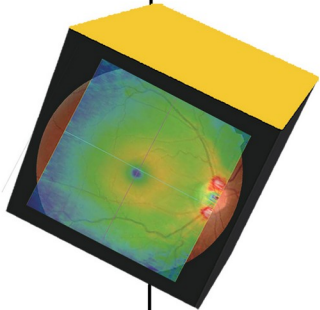

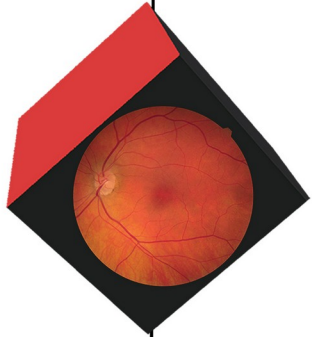

Look no further for your OCT health scan

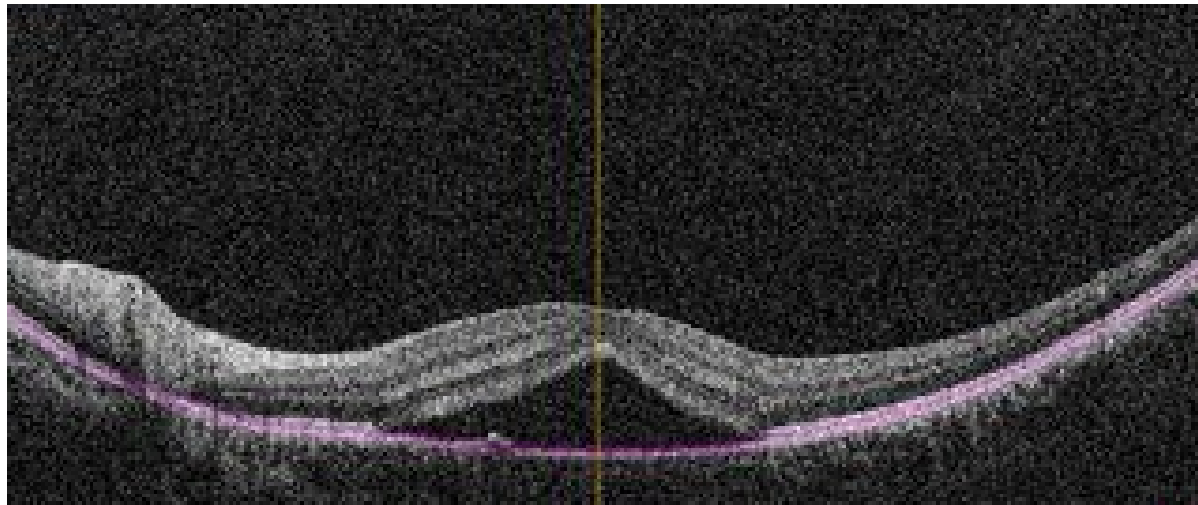

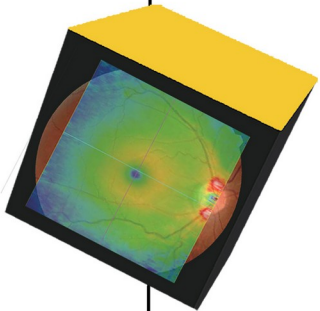

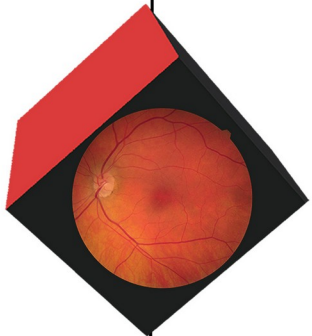

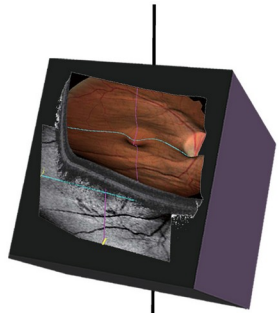

OCT (Optical Coherence Tomography) allows early detection and monitoring of numerous diseases such as:

- Glaucoma
- Diabetic Retinopathy
- Age Related Macular Degeneration
- Retinal Detachments
- And much more...

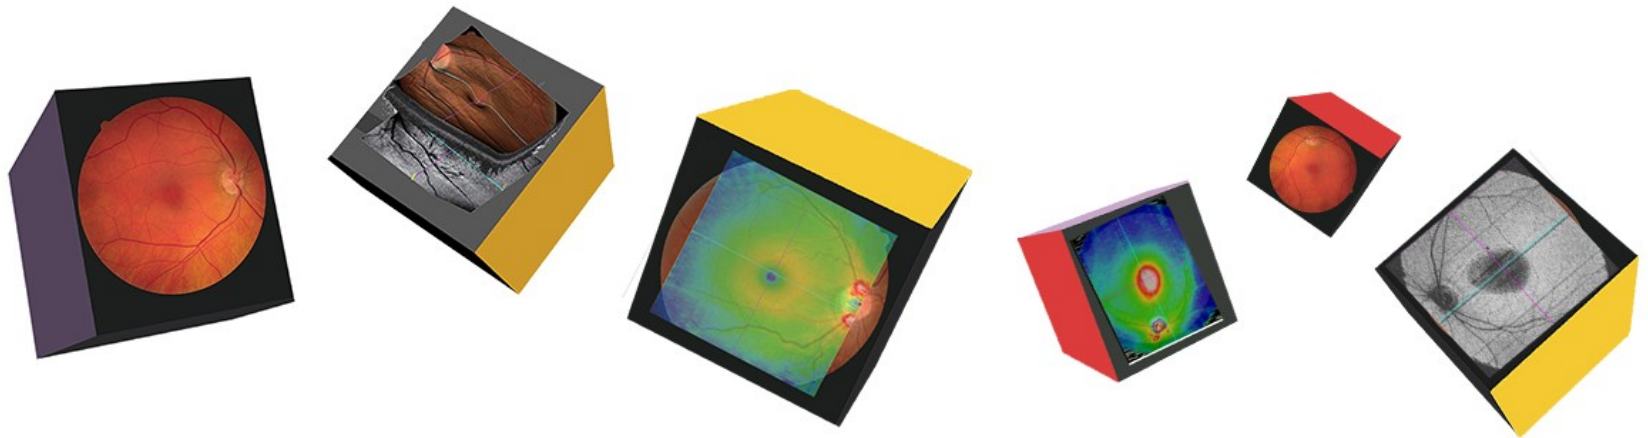

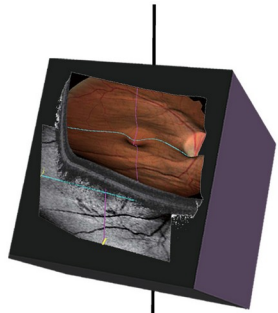

Your eyes are quite extraordinary...

During an eye examination, the anterior of your eyes get looked at for any abnormalities, however with our new state-of-the-art OCT service, we can now scan the back of your eyes in incredible detail, not visible by other means.

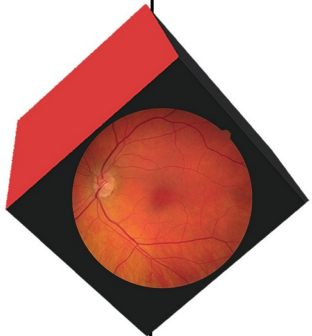

is crucial to look after your health
aswell as your vision

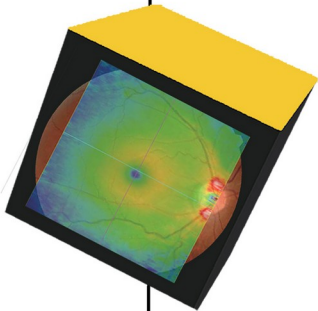

Which is why you should say yes to the OCT health check...

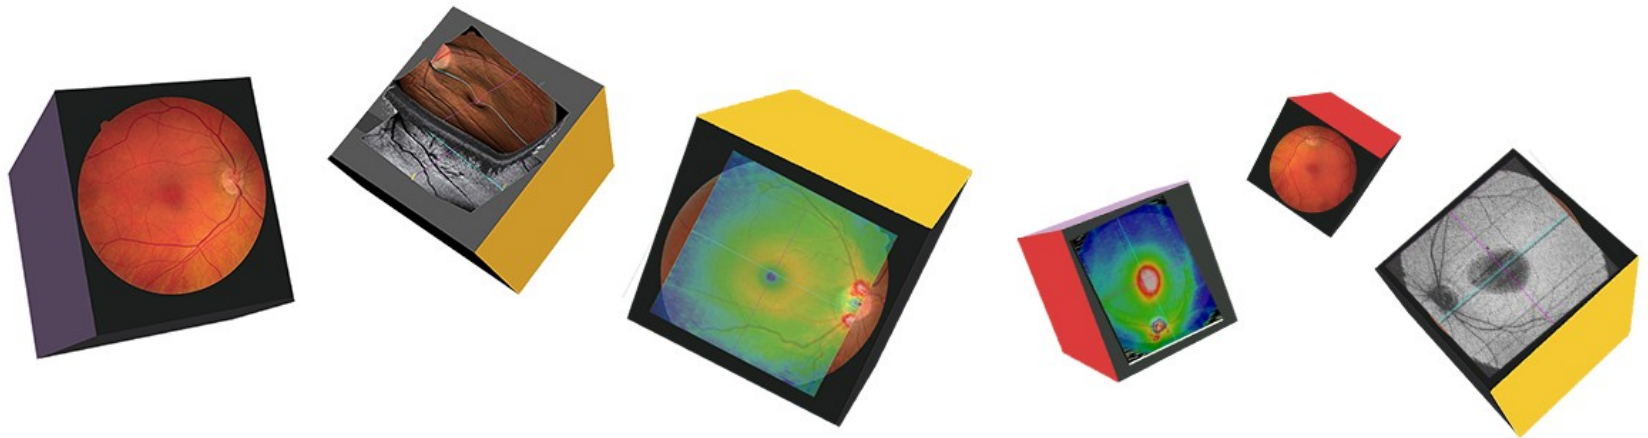

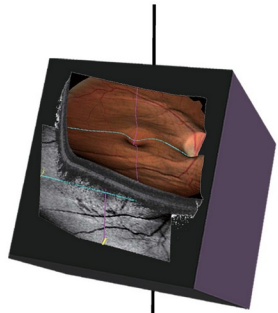

- Having an OCT health test as part of your usual eye examination will allow us to obtain the most detailed information about your overall eye health.
- Early detection will lead to timely treatment and better outcomes for the health of your eye and your overall health.

OCT FAQ's

Everything you need to know

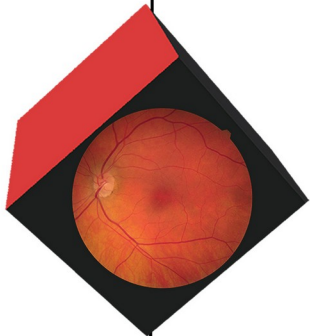

Does it hurt?

No, nothing at all touches your eye

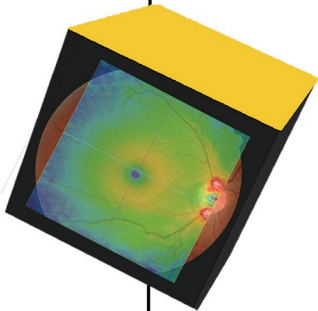

What happens during the scan?

You are simply required to sit in one position and look at a target through the device. The scan will end with a quick camera flash

Is OCT suitable for children?

Yes, it is important for children to undergo a quality routine eye examination

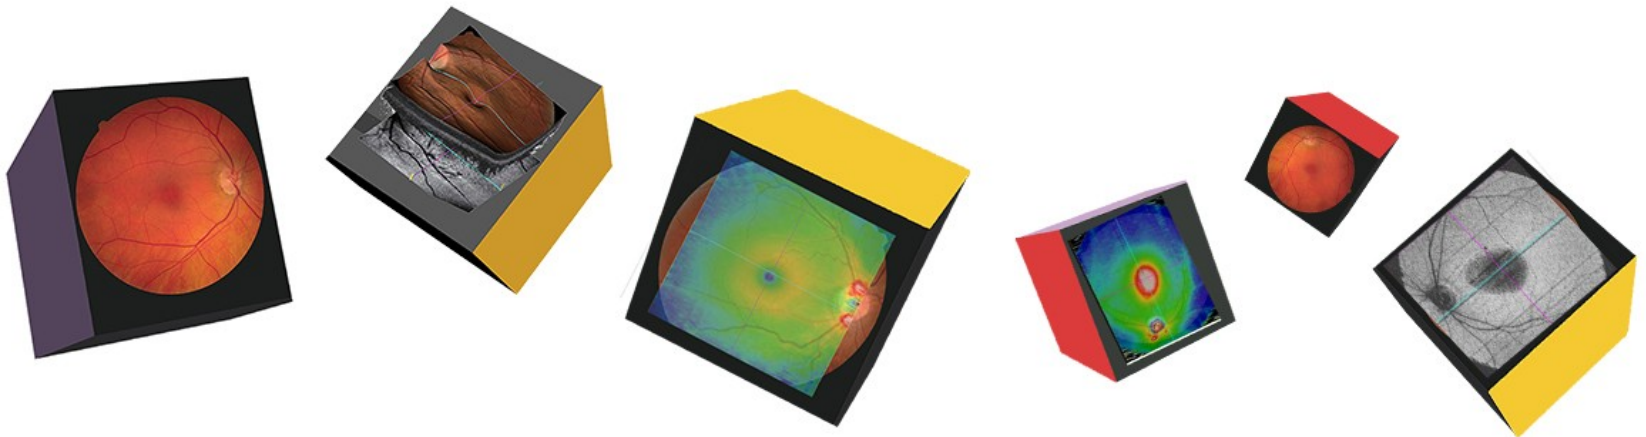

How long does it take?

It is a very quick process and will add on a few extra minutes to your eye examination
